Healing power

Ceramic artist David Marques has unveiled a new permanent ceramic installation for

Cancer Research UK's oncology clinic at Imperial College London. Entitled *Science with Care: Bringing Research to the Clinic*, David's piece depicts a series of butterflies fluttering through a healing meadow of flowers. The work, made from 250 individually cast Parian pieces, highlights the relationship between research and care, with the butterflies' wings taking the shape of DNA helices. Discover more about David's work at studiodavidmarques.com
